# PartsHandler® Inventory Management Software...

the most cost effective solution designed for the parts industry, with robust purchasing, inventory tracking and order processing.

PartsHandler® is one of the strongest inventory management software solutions available for the parts distribution industry. It will streamline your parts inventory management, create efficiency and a better bottom line.

Quick, accurate parts look up, prices that are current, ordered, picked, packaged, invoiced and tracked at all stages. PartsHandler® systems have been used for years with accuracy and simplicity. You or your staff are always on top of your business with PartsHandler®. The system is rock solid and has a fabulous "uptime" history.

The new PartsHandler® support team provides exceptional customer service, timely updates, 24/7 access and state of the art programming.

Automating the mundane lets you and your staff do what you do best; provide great customer service.

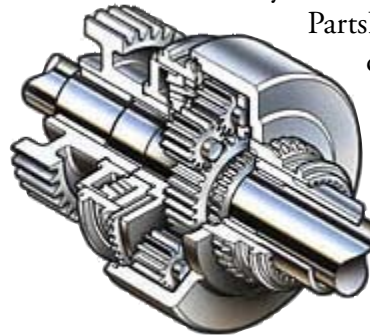

Complete inventory handling from optimizing your purchasing to inventory tracking and order processing. The back office of PartsHandler® is second to none

with purchasing, receiving, cash application, checks and balances throughout the system. PartsHandler® is the only system designed for your industry from the ground up.

**What ever part your customers need, you can look-up, price, order and deliver with confidence.**

Give PartsHandler® a try or ask one of our many satisfied customers. They will tell you it's speed and bug free design is made just for you.

PartsHandler® has been used in your industry for over two decades, if you have one branch or many it can handle the toughest inventory or price update challenges. Its strength is in its' history.

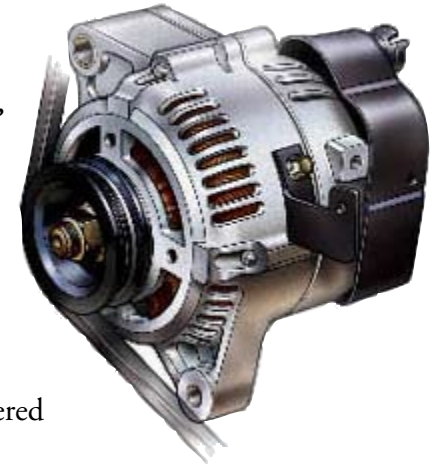

*Is your staff challenged to invoice the right price or credit the right core return, with accuracy?* Let PartsHandler® do the job for you with very efficient order

entry meaning a minimal amount of key strokes when your customer calls.

Create and store temporary orders, then complete, invoice and package when your customer authorizes the sale.

If you need modifications they are delivered quickly online.

*PartsHandler is developed and supported by MiComPro; MiComPro is a Software Developer, established in 1990, specializing in the Distribution Industry. MiComPro's customers are located across Canada and the United States with the majority in the automotive distribution after market.*

Call us today for a full briefing and demonstration, then let us install your entire point of sale network.
